Dual Zone Socket Management & I-Shell With Ritter Spiral Part 2

By Dr. Maurice Salama

Case Notes

Patient presents after Trauma to Central Incisor. Immediate Extraction CLASSIC Technique with Dual Zone Management performed with Ritter Spiral Implant, I-Shell and Immediate Temporary Restoration. Referring dentist DID NOT WISH for PET/SS Approach. Thoughts on 5 months healing?

1 - Occlusal View at 5 Months

2 - Occlusal View With Temp

3 - PA at 4 Months

4 - Lateral View of Ridge Contour

5 - Anterior View Notice Right Lateral Incisor Also An Implant Placed Immediately Years Ago

6 - Note Tissue Thicknes on Labial
